

SANTHOSHKUMAR S

Software Engineer - B.Tech IT

Dharapuram, Tamil Nadu, India | +91 9487528706 | writetokumarsanthosh@gmail.com
GitHub: github.com/SanthoshkumarS2407 | LinkedIn: linkedin.com/in/santhoshkumar-s-137b44377

PROFESSIONAL SUMMARY

Aspiring Software Engineer pursuing a B.Tech in Information Technology with a strong interest in designing and developing efficient software solutions. Experienced in building academic projects using modern web technologies and IoT platforms. Possesses excellent analytical thinking, problem-solving, and collaboration skills, with a strong desire to learn, innovate, and grow in a dynamic software development environment.

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Web Technologies: React.js, Node.js, MongoDB, HTML5, CSS3

Developer Tools & Systems: Git, GitHub, VS Code

UI/UX & Design: Figma, Wireframing, Responsive Web Design, User Interface Design

Professional Skills: Problem Solving, Analytical Thinking, Effective Communication, Adaptability

EDUCATION

VSB Engineering College, Karur — 2024 – 2028

Bachelor of Technology (B.Tech) in Information Technology | CGPA: 8.00

Bharathi Vidhyalaya Hr Sec School, Mulanur — 2023 – 2024

Higher Secondary Certificate (HSC) – Tamil Nadu State Board | Score: 84.3%

Bharathi Vidhyalaya Hr Sec School, Mulanur — 2021 – 2022

Secondary School Leaving Certificate (SSLC) – Tamil Nadu State Board | Score: 87.4%

PROJECTS

Smart Helmet IoT Safety System

Technologies: Arduino Uno, IR Sensors, MQ-3 Gas Sensor, GSM/GPS Modules

- Engineered an IoT-driven smart helmet system aimed at mitigating accident risks and enhancing rider protection.
- Implemented automated helmet-detection logic to restrict vehicle ignition until proper safety gear is detected.
- Configured an alcohol-monitoring sensor module using MQ-3 to detect impairment and prevent drunk driving.
- Integrated vibration, GSM, and GPS hardware modules to trigger instantaneous emergency location alerts upon impact.
- Elevated rider safety protocols by unifying intelligent sensor feedback with automated emergency dispatching.

Digital Village Learning Platform for Rural Schools

Technologies: React.js, Node.js, MongoDB, JSON Web Token (JWT), Cloudinary

- Architected a full-stack e-learning portal designed to expand digital educational access across rural schools.
- Enforced JWT authentication paired with role-based permissions to safeguard student and instructor resources.
- Structured modules for seamless streaming of video lessons, course collateral, interactive quizzes, and assignments.
- Leveraged Cloudinary media APIs for optimized asset delivery, reducing content loading latency across low-bandwidth networks.
- Refined interface responsiveness to deliver an intuitive, distraction-free user experience on low-spec devices.

Public CRM Management Application

Technologies: React.js, Node.js, MongoDB, HTML5, CSS3

- Designed a full-stack customer relationship web app to streamline lead tracking and contact management pipelines.
- Established granular access control routines and robust session management across multi-tiered user roles.
- Programmed RESTful CRUD operations to accelerate daily record processing and maintain data integrity.
- Constructed interactive, real-time analytics dashboards to monitor client engagements and sales performance metrics.
- Connected backend API endpoints with MongoDB schemas to facilitate high-availability data handling.

CERTIFICATIONS

- Programming Using Java** – Infosys Springboard
- Introduction to Internet of Things** – Cisco
- Becoming an Agentforce Champion** – Salesforce

AREAS OF INTEREST

Software Development • Full-Stack Development • Data Structures & Algorithms • Problem Solving • Web Development
